

Onslow Elementary Update^{C19}

May 21, 2021

Gardening at OES:

We've decided to do some gardening at OES: some edible greens and some wild flowers (all outside our classroom windows). It will be good for our students to see the growth and to learn the difference between weeds and other plants. Rest assured that students will be taking part in our gardening project in their class "bubbles."

Note: we recommend that students bring at least two water bottles that can be refilled especially when we are frequently outside in the warmer weather.

Recycled Music: 25-28 May

from Recycled to Music

Onslow is preparing for a week of workshops with a special guest artist, Louise Poirier. The students will get the chance to listen to a variety of musical instruments before constructing their own completely out of recycled materials. Each student will finish with an instrument to play in a final festival!

Warmer temperatures:

Choice of clothing should ensure coverage of chest to thigh areas. Students are encouraged to wear clothing that is comfortable enough to play and move freely in, while presenting themselves in a professional and public atmosphere. Clothing must not include inappropriate language, vulgarities, discrimination, racism, or sexually inappropriate messages.

Bugs, sun, and perspiration: like all public schools, OES has some students and staff who are sensitive to perfumed or scented personal body sprays and deodorants. To make sure everyone is ok, especially in summer weather, we recommend unscented mosquito repellent, sun block, and deodorant.

Our next PD day: June 4. This day is reserved for teachers who need to contact parents regarding IEPs and for preparing end of year activities.
